DETAILED ACTION

Claim 35 is pending in this application. Claims 1-34 and 36-42 have been canceled.

Election/Restrictions

Applicant's election without traverse of Group IV, claim 35 and the single species of claim 35 wherein R^8 is $-OCH_2OCH_3$ in Paper No. 5 is acknowledged.

Upon further consideration, the election of species requirement has been rescinded and claim 35 has been examined in its entirety.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by Bischofberger et al., WO 96/26933.

Applicant claims cyclohexene carboxylates as neuraminidase inhibitors. Bischofberger et al. teach cyclohexene carboxylates which are neuraminidase inhibitors. Bischofberger et al. teach the instant compounds in page 248, scheme 45, compound 345 and page 250, lines 23-24, compound 500.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bischofberger et al., WO 96/26933.

Determination of the scope and content of the prior art (MPEP §2141.01)

Applicant claims cyclohexene carboxylates as neuraminidase inhibitors. Bischofberger et al. teach cyclohexene carboxylates which are neuraminidase inhibitors. Bischofberger et al. teach compounds which are similar to the instant compounds in page 195, compounds 1 and 22. Bischofberger et al. teach compounds which are similar to the instant compounds when, in the instant compounds, R^8 is $-OH$ or $-OCH_2CH_3$.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the prior art and the instant claims is that the prior art teaches homologs of the instant compound. Prior art compounds 1 and 22 both contain a $-CO_2CH_3$ group, while in the instant compounds, the corresponding group is $-CO_2CH_2CH_3$. The prior art compounds and the instant compounds differ by a methyl group.

Art Unit: 1626

Finding of prima facie obviousness---rational and motivation (MPEP §2142-2143)

40
11/19/01
To those skilled in chemical art, one homolog is not such an advance over adjacent member of ^a series as requires invention because chemists knowing properties of one member of a series would in general know what to expect in adjacent members.

In re Henze, 85 USPQ 261 (1950). The motivation to prepare the instant compounds is in the expectation of obtaining compounds which could be used as neuraminidase inhibitors.

Abstract

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The reference cited on the PTO-892 is cited to show the state of the art only.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sonya Wright, whose telephone number is (703) 308-4539. The examiner can normally be reached on Monday-Friday from 8:00 AM - 5:30 PM.

All Internet e-mail communications will be made of record in the application file. PTO employees will not communicate with applicant via Internet e-mail where sensitive data will be exchanged or where there exists a possibility that sensitive data could be identified unless there is of record an express waiver of the confidentiality requirements under 35 U.S.C. 122 by the applicant. See the Interim Internet Usage Policy published by the Patent and Trademark Office Official Gazette on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist, whose telephone number is (703) 308-1235.
